

CONTROLLED SUBSTANCES

FLORIDAINFUSION maintains a large inventory of most commonly used controlled substances. To order Schedule Narcotics you must fill a DEA Form 222 and mail to us the top two copies while retaining the bottom blue copy for your records. These pharmaceuticals cannot be shipped until your DEA Form is received and a copy of your DEA license is on file. If you don't have these forms, you may obtain them from your local DEA office. If you need instructions on how to properly complete Form 222, feel free to call one of our Pharmacists for instructions. We cannot fill orders for Narcotics on a prescription pad. To order all other controlled substances (Schedules 🎩 & 💽 we simply require a copy of your DEA license. Controlled substances can be shipped only to the address appearing on the DEA license.

ABBOTT DROP SHIP PROGRAM - SAVE 5%

Florida Infusion can arrange direct shipments from your local Abbott warehouse of orders of 10 cases or more. You may **mix and match** any of the items listed here. The two advantages to our direct drop ship program are a 5% off-invoice discount and faster delivery - usually within 1 to 3 days - from the local warehouse. If you wish to take advantage of this program, call your account manager at 1-800-624-0152 and they will set up your account as a drop ship account. This process usually takes 2 to 3 days and it requires only a copy of your DEA license.

- INFUMED 200 OWNERS —

Medex has recently announced that as of June 30. 1996, Infumed 200 pumps will no longer be serviced and that their dedicated pump set, PP05, will no longer be produced. We urge you to switch to the new WalkMed 350 now! FloridaInfusion has been authorized to offer a generous rebate of \$600 for every Infumed 200 pump traded in for a new WalkMed 350. In addition to this outstanding trade-in allowance, take advantage of our special introductory price of \$1,895 for the WalkMed 350 making your net price as low as \$1,295. This is a tremendous savings, however, it is time limited, so act now! CALL 800-624-0152 FOR DETAILS.

AMBULATORY INFUSION

THE Selective PARAGON AMBULATORY INFUSION PUMP

The simple mechanical design, which utilizes a precision spring mechanism, provides a cost-effective precise and reliable delivery of I.V. medications. The Paragon infuser is made of high strength plastic and is designed to operate without a motor. It is small, noiseless, lightweight and can be carried discreetly. The pump is reuseable and it utilizes a small PVC administration set which accurately controls flow rate. Each infusion set includes a 100mL bag and a 50" microbore administration set with a 1.2 micron air eliminating filter and secure lock. 7 different sets are available to provide a full range of flow rates and infusion times.

EFFICACY

- Continuous infusion assures steady-state drug levels within therapeutic range
- Continuous infusion may enhance efficacy of many antineoplastic agents MOBILITY'
- · Lightweight, compact for easy portability
- · No I.V. poles, electrical connections, or batteries
- Eliminates capital outlays and leasing costs
- · Eliminates maintenance and tracking costs
- · Simple design requires minimal staff and patient training time

Baxter INTERMATES

SAFETY

- · Positive pressure eliminates gravity flow problems
- · Flow rate restrictor prevents runaway infusions
- Flow rate accuracy is superior to gravity systems
- · Flow rate flexibility allows choice of infusion time MOBILITY
- · Easy ambulation, no LV, pole, electric cords, or batteries
- · Small, silent, lightweight design is easy to carry, with minimal interference in daily activity

ECONOMY

- Single-use disposable design eliminates capital outlays
- No maintenance or downtime
- · Minimal patient training time
- · Simplicity of device encourages patient compliance

BAXTER INTERLINKTM SYSTEM

InterLink' Access System eliminates needlestick risks in a wide range of applications

- InterLinkTM cannula prevents accidental needlesticks and simplifies safe disposal.
- Helps reduce costs associated with needlestick injury treatment, loss of productivity, and hospital
- Requires minimal changes in technique used like a conventional needle-based system.

MIXING ACCESSORIES

Mini-Spike* I.V. Additive Dispensing Pen For preparing and dispensing diluent or additive from multi-dose rubber stoppered vials.

.2 Micron Aspiration / Injection Disc Filter With proximal and distal Luer Locks, designed for

CDP 2000

Chemo Dispensing Pin³

With distal Mini-Spike⁸, proximal, female Luer lock and built-in .2 micron hydrophobic airventing filter. Eliminates aerosoling of chemotherapy medications during dispensing.

bacteria retentive filtration of medication either aspirated or injected - fluid retention of 0.3ml.

Lateral Flow Vented Needle

Vented piercing pin. specifically designed to minimize drug foaming during the reconstitution

Fluid Dispensing Connector

With proximal and distal female Luer-Locking ears - for prefilling of unit dose syringes from a large master syringe.

R 2000

Dual function (Red) capping device. Female Luer lock connection with opposite male Luer lock collar connection.

DPL 2500

Transfer Extension Set with Mini-Spike

For aspiration of medication from inverted multidose vials. Utilizes a bacterial retentive air-venting system. 24 inch length.

FN 5119

Filter Needle

5 micron filter in female Luer lock hub: 19 Ga. x $\Gamma^{1/2}$ " thinwall needle for withdrawal or injection of medication from rubber stoppered vial.

CENTRAL LINE SUPPLIES

CVS DRESSING KIT

The leader in sterile dressing kits.

Featuring **Tegaderm** 4x4³/₄

CONTENTS OF DRESSING CHANGE KIT #6390:

- Mask
- · Pair of Gloves
- · Isopropyl Alcohol Swabstick, Triples
- · Iodophor PVP Swabstick. Triples
- · Clinidine PI Iodine Ointment
- 4" x 4" Cotton Gauze Sponge

- 2" x 2" Cotton Gauze Sponge
- 2" x 2" Non-Woven Split Sponge
- 2" x 2" Non-Adhering Pad
- 4"x 43/4" Transparent Dressing
- 1" x 18" Roll of Medical Tape
- Tape Tray

HUBER NEEDLES AND SETS

OUR CUSTOM LABEL BRAND OF INFUSION SETS IS NOW TAXOL COMPATIBLE !!

FEATURES:

- TAXOL compatible tubing
- Soft wings for secure positioning
- · Non siliconized needles to minimize "back out"
- One handed shut-off clamp
- · Small bore, kink & collapse resistant tubing
- Two styles ... with or without Y site

WINGED INFUSION SETS

19 x 3/4", 19 x 1", 20 x 3/4", 20 x 1" 22 x 3/4", 22 x 1", 22 x 1 1/2"

Without Side Port

FLORIDAINFUSION

VAC MDI 0425

SYRINGES & NEEDLES

FloridaInfusion stocks the three major national brands of syringes and needles: Terumo, Sherwood Monoject and Becton Dickinson. Most of our customers prefer to buy Terumo brand for the combination of quality and affordability. We stock over \$1 million of Terumo products and have set our regular prices to be extremely competitive. We further discount Terumo products during periodic sales by 10%-20% and provide, upon request, special contract pricing for volume commitments.

TERUMO

NEEDLES AND SYRINGES

Even with your most challenging patients - the patient with thicker skin, the elderly woman with fragile veins, the apprehensive child - superior performance is assured. Precisely honed edges and unique bevel design easily penetrate tissue with an incision that minimizes trauma. An exclusive silicone lubricant allows the needle to travel smoothly, from the moment of penetration until it is removed.

A visual advantage to help in managing treatment.

Clarity of the barrel allows you to quickly check for turbid medication and air bubbles. Bold scale markings help assure precise measurement of the dose. The translucent needle hub permits quick observation of flashback.

Uniquely designed for safety and control.

The posi-Stop plunger prevents accidental separation and spillage...avoiding exposure to dangerous or infectious fluids. Large finger flanges and thumb post allow for better control.

Minimal discomfort with Ultra Thin Wall needles.

The Ultra Thin Wall needles allow you to choose a slimmer. more comfortable gauge size with increased flow rate over Regular Wall or Thin Wall needles.

SYRINGES & NEEDLES

ERUMO SURFLO® I.V. Catheters

A series of superior I.V. catheters combining the features most requested by nurses and physicians. From the Terumo I.V. catheter's trasharp introducing needle to the ..ydrophobic membrane filter, a truly remarkable degree of attention has been given to providing a device that is easier to insert, less traumatic and more comfortable for the patient. \$4500

Per Box of 50

- Sharp outer bevel facilitates the initial incision, even through thicker skin, to minimize patient discomfort.
- Smooth inner bevel allows effortless penetration without unnecessary tissue trauma.
- Exclusive silicone lubricant further enables both needle and catheter to travel smoothly.

- Flashback chamber permits fast and easy confirmation of venous access.
- A distal "preview chamber" to show even the first drop of blood.
- Unique, thin, hydrophobic membrane filter that allows air to vent easily with virtually no resistance...achieving rapid blood return into the chamber with the safety of not allowing the blood to pass the filter itself.

- · Safe, easy to handle, color coded packaging...plus tamper evident seal.
- Individual, sterile Safety Cases with tamper evident indentification band.
- Color coding, for rapid catheter indentification.
- · Easy twist-off case cap to remove the catheter.

VENIPUNCTURE

SCALP VEIN WINGED INFUSION SETS

FloridaInfusion stocks a variety of brands of scalp vein winged infusion sets: Terumo, Deseret, Abbott "Butterflies", and Kawasumi. Over the years we have found that Terumo is the most widely used infusion set because of its design characteristics, technical specifications and, most importantly, low pricing. We have acquired a large amount of inventory from Terumo and have obtained substantial discounts which we would like to pass on to you. We have permanently reduced the price of a standard box of 50 sets to \$16.00 and would advise all customers to utilize this quality, inexpensive infusion set.

TERUMO SURFLO® WINGED INFUSION SETS

\$16⁰⁰
Per box of 50

Ultra Thin Wall needle allows minimal discomfort and provides increased flow rate over Regular Wall and Thin Wall needles.

Sharp, beveled-up needle creates a U-shaped surgical flap rather than a puncture wound mimimizing trauma and patient discomfort.

Kink-resistant tubing made of non-toxic medical grade PVC; soft and flexible, resists kinking and curling.

KAWASUMI WINGED INFUSION SETS

The sets are available in three needle gauges, with color-coded wings to quickly identify size. Siliconized thin-wall needles ensure adequate flow rates and patient comfort. The wings are textured on one side to ensure a secure grip. The other side features corresponding concave and convex dimples that "lock" together to facilitate precise control of the needle during insertion.

PRICE LIST

A word about pricing

We strive to provide our customers with the best BottomLine* prices everyday of the year. Since we are all involved in an industry that must react to price changes from manufacturers without notice, we want you to be clear about our advertised prices. The prices in this newsletter are effective as of March 19, 1995. We will honor all prices for items advertised as having a "valid through date . . . ", through that date. We will honor all other advertised prices unless those prices are affected by a price increase from the manufacturer. We have no control over price increases from manufacturers. We do our best, however, to notify our customers in the event of price changes, especially when notice is given, and try to create buying opportunities when we can. We invite you to call at any time for a current price quote.
